

SECTION 49  
CONSERVATION AND SOLAR ASSESSMENT

49.1 CONSERVATION AND SOLAR ASSESSMENT

The conservation and solar assessment charge included in the Basic Rate Per Month section of CMP's rates schedules is provided below. The conservation and solar assessment is charged on a kilowatt-hour basis. The rates presented below are applicable both to core rates schedules and to targeted rates.

The conservation and solar assessment charge by core rate schedule is shown below:

<u>Rate</u>	<u>\$/kWh</u>	<u>Rate</u>	<u>\$/kWh</u>
A	.00150	MGS-P	.00150
AL	.00150	MGS-P-TOU	.00150
A-LM	.00150	MGS-S	.00150
A-TOU	.00150	MGS-S-TOU	.00150
IGS-S-TOU	.00150	R	.00150
IGS-P-TOU	.00150	R-TOU	.00150
LGS-S-TOU	.00150	SGS	.00150
LGS-P-TOU	.00150	SGS-TOU	.00150
LGS-ST-TOU	.00005	SL	.00150
LGS-T-TOU	.00005		

Targeted Contracts and Programs:

The conservation and solar assessment will be \$.00150 per kWh for targeted rate customers taking service at distribution voltages and \$.00005 per kWh for targeted rate customers taking service at subtransmission and transmission voltages. For targeted contracts and programs where the price in the contract or program less transmission and the electric lifeline program assessment is less than the applicable conservation and solar assessment, the conservation and solar assessment is the difference between the price in the contract or program on a per kWh basis and transmission and the electric lifeline program assessment.
