

SECTION 9
INTRODUCTION OF SERVICE

9.1 WIRING IN PROGRESS

The Company is not required to install service-supply lines prior to the time that the wiring of the premises is actually in progress, and the structure sufficiently completed to provide a safe and suitable terminus for the service-supply lines.

9.2 DEFECTIVE INSTALLATION

The customer's installation, before connection to the lines of the Company, shall comply with the latest requirements of the National Electric Code, Municipal and other authorities having jurisdiction and, in addition, to the applicable rules of the Company's Handbook of Requirements for Electric Service and Meter Installations. The Company reserves the right to refuse to connect, or to continue service already connected, where the customer's installation is defective, based on the requirements of the National Electric Code, or does not comply with the Company's Handbook of Requirements for Electric Service and Meter Installations. The Company shall in no way be responsible for the maintenance or installation of the customer's property, nor shall there be any duty or obligation at any time to inspect the same.

9.3 UNSATISFACTORY INSTALLATION

The Company may refuse to connect, or continue service already connected, if, in its judgment, the customer's equipment, or use there of, might injuriously affect the equipment of the Company or the Company's service to other customers.

Effective Date: April 25, 2006

R. Scott Mahoney
