

SECTION 12  
METERS

12.1 SUPPLY OF METERS

The measurement of electric service shall be by meters installed, owned, and maintained by the Company, except where it is impracticable to do so. The Company will select the type and make of metering equipment, and may, from time to time, change or alter the equipment.

12.2 SPECIAL MEASUREMENTS

The Company shall have the right, at its option and its own expense, to place demand-meters, load survey meters, or other instruments and equipment on the premises of any customer for the purpose of measuring the demand, collecting interval data, or for other measurements of all or any part of the customer's load.

12.3 METER TESTS

The Company, at its expense, will make periodic or sample tests and inspections of its meters in order to maintain them at a high standard of accuracy. The Company also will perform such other tests as it deems necessary for the proper administration of its rates, or as required by applicable laws and regulations.

12.4 REQUEST TESTS

The Company will test the accuracy of a customer's meter upon request of customer. The test shall be done at no charge to the customer, provided that the customer has not requested a test within the past 12 months or the meter has not otherwise been tested within the past 12 months. If a customer requests a meter test within 12 months of the date of the most recent test of the customer's meter, the Company will charge the customer for the reasonable cost of the test. This charge shall be refunded or credited to the customer if the meter does not meet the accuracy standards set forth in Sections 12.5 and 12.6 below.

A customer may be present when the Company conducts a requested test of the customer's meter or the customer may send another person as its representative. The Company shall provide a written report to the customer that provides the results of the meter test and shall retain a copy of the report for a period of no less than five years.

12.5 ADJUSTMENT OF BILL - REFUND

- a) When the Company determines that it has over-billed a residential customer because 1) the test of his or her meter reveals its average accuracy to be more than two percent (2%) high, based on the ANSI Method 1 average percent registration method 2) the Company discovers that the meter records have been switched or 3) for other reasons, the Company will refund to the customer excess charges for the previous six (6) months, or the actual period of error, not to exceed six (6) years, if the actual period can be determined.

Effective Date: November 9, 2019

Eric N. Stinneford

SECTION 12  
METERS

12.5 ADJUSTMENT OF BILL - REFUND (Continued)

- b) When the Company determines that it has over-billed a non-residential customer because 1) the test of his or her meter reveals its average accuracy to be more than two percent (2%) high, based on the ANSI Method 1 average percent registration method 2) the Company discovers that the meter records have been switched or 3) for other reasons, the Company will refund to the customer excess charges for the previous six (6) months, unless it can be shown from the records of either party that the error has existed for a greater or lesser period, in which case the refund shall cover the actual period; provided, that in no case shall a refund cover a period longer than the previous six (6) years.

12.6 ADJUSTMENT OF BILL - CHARGE

- (a) When the Company determines that it has under-billed a residential customer because 1) the test of his or her meter reveals the meter's average accuracy to be more than two percent (2%) low, based on the ANSI Method 1 average percent registration method 2) the Company discovers that the meter records have been switched or 3) for other reasons except for unauthorized use or fraud by the customer, the Company may issue a make-up bill for the unbilled charges for the previous six (6) months, or the actual period of error, not to exceed twelve (12) months (consistent with Section 8E1 of Chapter 815 of the Maine Public Utilities Commission), if the actual period can be determined. In the event of unauthorized use or fraud by a residential customer, the Company may issue a make-up bill for the unbilled charges for the previous six (6) months, or the actual period of unauthorized use or fraud, not to exceed six (6) years, if the actual period can be determined.
- (b) When the Company determines that it has under-billed a nonresidential customer because 1) the test of that customer's meter reveals the meter's average accuracy to be more than two percent (2%) low based on the ANSI Method 1 average percent registration method, 2) the Company discovers that the meter records have been switched or 3) for other reasons except for unauthorized use or fraud by the customer, the Company may issue a make-up bill for the unbilled charges for the previous twelve (12) months.

12.7 METERS PERFORMANCE, TESTING AND ACCURACY STANDARDS

The Company's meters shall comply with the performance criteria, and other applicable standards set forth in the most recent version of ANSI C12.1 (American National Standard for Electric Meters – Code for Electricity Metering) that is in place at any time. The Company's meter testing protocols and processes shall also meet the most recent ANSI C12.1 testing standards in place at the timing of testing.

SECTION 12  
METERS

12.8 METER LOCATION ADJUSTMENT

When service is metered at a lower or higher voltage than the delivery voltage, the measured kWh will be increased or decreased respectively by 2% for billing purposes or, at the option of the Company, a continuous on-site adjustment will be made through compensating metering equipment or a factor applied based on the transformer manufacturer's data.

12.9 NONSTANDARD METER INSTALLATIONS

The Company will install a nonstandard meter at the request of a customer and will accommodate requests for nonstandard meters as quickly as practicable in the normal course of the Company's business. Nonstandard meters include meters installed as part of CMP's Smart Meter Opt-Out Program.

With the exception of meters installed as part of CMP's Smart Meter Opt-Out Program, the Company will charge its incremental costs of owning, maintaining, and installing the nonstandard meter to the customer. The Company, at its sole discretion, may require advance payment from the customer.

Section 12.11 of CMP's Terms and Conditions describes requirements for participation in the Company's Smart Meter Opt-Out Program.

12.10 MASTER METERING STANDARD

1. RESIDENTIAL SERVICE

Each dwelling unit in a building that contains more than one residential dwelling unit will be separately metered unless the occupant of each such unit does not have control over any portion of the electric energy used in such unit, or with respect to any portion controlled by the occupant, the long-run benefits to the electric consumers in such building do not exceed the costs of purchasing and installing separate meters in such building. Master metered residential services existing as of December 16, 1983 may be continued.

2. GENERAL (NON-RESIDENTIAL) SERVICE

All new commercial buildings that will contain more than one separately leased or owned unit will be separately metered unless the occupant of each such unit does not have control over any portion of the electric energy used in such unit, or with respect to any portion controlled by the occupant, the long-run benefits to the electric consumers in such building do not exceed the costs of purchasing and installing separate meters in such building.

SECTION 12  
METERS

12.11 SMART METER OPT-OUT PROGRAM

Any customer with single phase metering taking service at a secondary voltage level and who chooses not to have a standard wireless smart meter installed on their premises may choose to opt-out of having a smart meter and instead, have a non-standard non-communicating solid state meter installed.

- a. A customer selecting the opt-out alternative will pay (i) an Initial Charge of \$40.00 per meter, which will appear on the customer's first bill following the date the customer chooses this alternative and; (ii) a Recurring Monthly Charge of \$19.63 per meter beginning by the later of July 1, 2025 or the date the customer chooses this alternative.

If the customer's existing meter is a properly functioning electro-mechanical or solid state meter, the customer may retain said meter and will pay the Initial Charge and Recurring Monthly Charge described above. The Company, at its sole discretion, may replace the customer's existing electro-mechanical or solid state meter with an equivalent meter.

- b. A customer will be subject to the charges outlined above each time they establish service at a new premise location and choose to opt out of having a standard smart meter at that new premise location.
- c. If a customer has multiple meters as described in CMP's Term and Condition 4.2 that are not standard wireless smart meters and the energy usage registered on those meters is added together and combined into one bill, with one customer charge, the customer will pay a single Initial Charge and Recurring Monthly Charge. For all other multiple meter situations, the customer will pay an Initial Charge and Recurring Monthly Charge for each meter that is not a standard wireless smart meter.
- d. A customer choosing to convert to a standard wireless smart meter from a non-standard opt out meter will not be charged for the conversion. The customer remains responsible for any unpaid opt-out charges incurred by said customer prior to conversion to a standard wireless smart meter.

SECTION 12  
METERS

12.11 SMART METER OPT-OUT PROGRAM (Continued)

Residential Electricity Lifeline Customers

If the customer participates in the Company's Residential Electricity Lifeline Program described in CMP's Term and Condition 33 and has an income level equal to or less than 100% of the Federal Poverty Guidelines, the customer will pay fifty percent (50%) of the Initial Charge and Recurring Monthly Charge related to their opt-out selection. If the customer participates in the Company's Residential Electricity Lifeline Program and has an income level greater than 100% of the Federal Poverty Guidelines, the customer will pay seventy-five percent (75%) of the Initial Charge and Recurring Monthly Charge related to their opt-out selection.

Short-Term and Temporary Service

For any short-term service customer participating in the Company's Smart Meter Opt-Out Program, the Company will bill the Recurring Monthly Charge consistent with the billing of the Service Charge or Minimum Charge. The Company will bill the Initial Charge on the customer's first bill following the date the customer chooses their opt-out alternative.

For any temporary service customer participating in the Company's Smart Meter Opt-Out Program, the Company will bill an Initial Charge and Recurring Monthly Charge consistent with subsections a and b above. If the temporary service customer becomes a permanent service customer, the Company will continue to bill a Recurring Monthly Charge but will not bill an additional Initial Charge.
