spent with Maine-  
based suppliers

**5,013**  
hours volunteered  
by employees

**9,376**  
jobs supported  
across Avangrid's  
Maine operations

## Meet the CEO

**Joseph A. Purington**  
President and CEO

Joe Purington was appointed President and CEO of Central Maine Power (CMP) in September 2021. As a Maine native, Joe spent his early career at CMP where he served in a variety of different roles including Director of Distribution Operations. In 2014 he joined

Eversource New Hampshire and in January 2020 became President, New Hampshire Operations. Purington earned a bachelor's degree from Southern New Hampshire University and an associate degree from Southern Maine Vocational Technical Institute. He is actively engaging with communities and organizations that support other Mainers statewide.

CMP's 11,000-square-mile service area is larger than the states of Massachusetts and Rhode Island combined. It contains about 78% of Maine's population and major commercial and manufacturing centers.

We trace our origins to November 7, 1899, when founding partners, attorney Harvey Eaton and engineer Walter Wyman, bought a hydroelectric generator providing street lighting and service to about 100 customers in the village of Oakland, Maine. They soon began a long program of expanding their service area through interconnection and acquisitions, and began using the name Central Maine Power in 1910.

Since its founding, CMP has delivered billions of kilowatt-hours of electricity to homes and businesses across Maine.

## Working together to deliver the power America needs

### Reliability

Investing in the safety, security and resiliency of our service to meet the needs of our customers.

### Innovation

Leveraging the power of technology to transform the energy system for the future.
