# Button Up Your Home and Save

*Increasing the amount of insulation in your home can reduce heat loss during the winter and heat gain during the summer.*

When insulation is properly installed, heating and cooling systems will run less, helping to reduce energy bills and to keep you more comfortable. Insulation can even pay for itself in as little as three years through reduced heating and cooling costs.

**Efficiency Maine** offers **rebates of 40%** of the cost of an insulation project up to a **maximum rebate of \$4,000** when you hire a Residential Registered Vendor (You can find a list on our website.) to insulate and seal drafts in your home. Enhanced rebates are available to qualified low- and moderate-income homeowners.

Visit **efficiencymaine.com** or call  
**866-376-2463** for more information.
